SUMMARY

CRM and marketing automation specialist running GoHighLevel, email, websites and (where needed) SMS for 8 clients at once at a US outsourced-CMO agency; about a year of hands-on experience (since Sep 2025). Doubled a nonprofit's average email click rate to 9.5% while scaling from 3 to 11 monthly campaigns (Apr–May 2026), warmed a dedicated sending subdomain to 6,500 emails/day, and handles SPF/DKIM/DMARC and A2P 10DLC registration. Drove the agency's platform moves from Mailchimp to HubSpot + ActiveCampaign, then GoHighLevel, then a self-built email/SMS platform that is now replacing it. Builds sites, webhook integrations and internal tools with AI-assisted development (Claude Code); uses Claude daily since 2025. Available for full-time work; can start within 1-2 weeks of an offer.

EXPERIENCE

Implementation Specialist — CRM, Web & Marketing Systems

Arrow Group Consulting · Michigan, USA (remote) · Part-time contract · Feb 2026 – Present

US outsourced-CMO agency; hired directly after a Doneverse placement. Handles 8 clients at once: marketing automation, GoHighLevel CRM, lifecycle email (plus SMS where needed) and websites.

- Doubled a nonprofit mentoring org's average email click rate (4.5% to 9.5%) while scaling from 3 to 11 campaigns month over month (Apr–May 2026). Emails delivered rose 352% and opens held at about 29–31%.
- Moved the agency onto GoHighLevel in Feb 2026 because 2 clients needed SMS; now replacing it with a self-built in-house email/SMS platform.
- Warmed a campus radio station's dedicated sending subdomain to 6,500 emails/day with SPF/DKIM/DMARC aligned. Run the station's newsletters, email campaigns and advertiser pipeline.
- Secured A2P 10DLC brand approval and a verified business number for a utility contractor, and delivered its domain migration, new website, lifecycle email and CRM.
- Lead technical client onboarding (GoHighLevel sub-account, workflows, pipelines, business profile, sending domain, email service, Cloudflare DNS and domain go-live) and ship monthly email and SMS campaigns, segmentation and nurture flows, reporting results to the founder and clients.
- Integrated Square payments through the Square API on a Cloudflare-hosted client site. Moved client websites to Cloudflare and build new client sites there (since Feb 2026); also migrated a WordPress client's site to Wix.
- Wrote the business case (projected ~89% lower monthly platform cost, no external build spend) and built the agency's in-house email/SMS platform (Cloudflare Workers + D1, React, Resend, Twilio) with AI-assisted development (Claude Code); 6 accounts went live about 5 weeks after the first commit (Aug–Sep 2026).
- Planned a phased migration of 10,000+ contacts with GoHighLevel kept running in parallel. Built in one-click unsubscribe, automatic opt-out on bounces and complaints, and an SMS block until A2P 10DLC approval.
- Built an internal content-operations hub (React + Firebase PWA, in daily production) that brings 5 scattered tools into one workspace. It pulls GoHighLevel campaign stats, plus bounce, spam and unsubscribe counts through a webhook.
- Other duties: design print graphics for the agency (printed through Vistaprint), keep the monthly expense tally and handle team communication on WhatsApp. Onboarded a music client (Stripe payments on its Cloudflare site) and distribute its piano recordings through DistroKid.

Virtual Marketing Assistant (VMA), agency placement

Doneverse · Philippines · Sep 2025 – Feb 2026

Agency that recruits, trains and matches marketing talent with US founders.

- Technical implementer for 2 US founders: Arrow Group Consulting's founder (Sep 2025 – Jan 2026; led to a direct hire), then keynote speaker Jonathan Fanning, handling the Kajabi work for his business.
- Built and configured HubSpot, Mailchimp, Kajabi and Wix Studio accounts: Mailchimp and HubSpot onboarding and nurture sequences, domain configuration, email deliverability and Wix Studio sites.
- At Arrow Group Consulting (then Mailchimp + Wix; one client on WordPress), learned HubSpot on the job, then recommended it and ActiveCampaign; both were adopted, and ActiveCampaign fixed a client's Mailchimp login errors.

Social Media & Content

- ADAP Real Estate, Subic (working student, 2024 to 2025, until graduation): created listing graphics and posted property listings on social media.
- Personal: run a faceless YouTube channel and a clipping page, planning the content calendar and scheduling posts.

SKILLS

- **CRM & Email Marketing:** GoHighLevel / HighLevel / GHL (sub-accounts, workflows, pipelines, tags and custom fields, forms, website/funnel builder, webhooks, payment links, API), HubSpot, Mailchimp, ActiveCampaign, Kajabi; lifecycle, drip and nurture sequences, audience segmentation, A/B testing, pre-send QA, SMS campaigns, campaign reporting, mobile-first HTML email
- **Deliverability & Compliance:** SPF/DKIM/DMARC, dedicated sending domains, domain warm-up, A2P 10DLC brand/campaign registration, unsubscribe and opt-out handling, Resend, Twilio
- **Integrations:** n8n, webhooks, lead-capture forms wired to GoHighLevel workflows, JotForm, Google Apps Script, Google Sheets API, Square API, Stripe
- **Web & AI (AI-assisted development, Claude Code):** HTML/CSS/JS, React, Tailwind CSS, Astro, Firebase, Cloudflare Pages/DNS/Workers, Wix Studio + Velo, WordPress, technical SEO (JSON-LD, sitemaps), Claude API, OpenAI API
- **Content & Operations:** social media graphics and posting, content calendars and scheduling, print design (Vistaprint), digital music distribution (DistroKid), expense tracking, WhatsApp team coordination
- **Tools, Languages & Setup:** ClickUp, Notion, Google Workspace, Canva, Figma, Git/GitHub · English (professional working proficiency), Filipino (native) · Work setup: laptop, two separate internet providers (one as backup), UPS for the internet router

SELECTED PROJECTS

Lead-generation automation — n8n + Claude + GoHighLevel (personal project)

- Designed a 47-node n8n workflow built to run on a daily schedule. It pulls 14 RSS feeds from 7 job boards, filters by target keywords and removes duplicates against a Google Sheet.
- Finds contact emails through a Hunter, Snov and Apollo fallback chain, has Claude personalize each opening, and syncs contacts, notes and opportunities to GoHighLevel. Drafts wait for human review and are never sent automatically.

EDUCATION

BS Computer Science, Gordon College, Olongapo City · 2021–2025

Thesis published at IRCITE 2025 (Bulacan State University).

Senior High School, TVL–ICT Track, Columban College Inc., Olongapo City · 2019–2021 · Graduated With High Honors
