SUMMARY

CRM and marketing automation specialist running GoHighLevel, email and SMS for a US outsourced-CMO agency's clients. Doubled a nonprofit's average email click rate to 9.5% while emails delivered grew 4.5x (Apr–May 2026), warmed a dedicated sending subdomain to 6,500 emails/day, and handles SPF/DKIM/DMARC and A2P 10DLC registration. Builds custom-coded sites, webhook integrations and internal tools with AI-assisted development (Claude Code). Works US business hours (ET–PT overlap), async-first, and replies within 24 hours. Available full-time immediately.

SKILLS

- **CRM & Email Marketing:** GoHighLevel (sub-accounts, workflows, pipelines, forms, webhooks, payment links, API), HubSpot, Mailchimp, Kajabi; lifecycle, drip and nurture sequences, audience segmentation, SMS campaigns, campaign reporting, mobile-first HTML email
- **Deliverability & Compliance:** SPF/DKIM/DMARC, dedicated sending domains, domain warm-up, A2P 10DLC brand/campaign registration, unsubscribe and opt-out handling, Mailgun, Resend, Twilio
- **Integrations:** n8n, webhooks, lead-capture forms wired to GoHighLevel workflows, JotForm, Google Apps Script, Google Sheets API, Square, Stripe
- **Web & AI (AI-assisted development, Claude Code):** HTML/CSS/JS, React, Tailwind CSS, Astro, Firebase, Cloudflare Pages/DNS/Workers, Wix Studio + Velo, WordPress, technical SEO (JSON-LD, sitemaps), Claude API, OpenAI API
- **Tools & Languages:** ClickUp, Notion, Google Workspace, Canva, Figma, Git/GitHub · English (professional working proficiency), Filipino (native)

EXPERIENCE

Implementation Specialist — CRM, Web & Marketing Systems

Arrow Group Consulting · Michigan, USA (remote) · Part-time contract · Feb 2026 – Present

Outsourced-CMO agency. Scope: marketing automation, GoHighLevel CRM and lifecycle email/SMS for 6 active client accounts.

- Doubled a nonprofit mentoring org's average email click rate (4.5% to 9.5%) while scaling from 3 to 11 campaigns month over month (Apr–May 2026). Emails delivered rose 352% and opens held at about 29–31%.
- Warmed a campus radio station's dedicated sending subdomain to 6,500 emails/day with SPF/DKIM/DMARC aligned. Run the station's newsletters, email campaigns and advertiser pipeline.
- Secured A2P 10DLC brand approval and a verified business number for a utility contractor, and delivered its domain migration, new website, lifecycle email and CRM.
- Ship monthly email and SMS campaigns, segmentation and nurture flows, and report results to the founder and clients.
- Lead technical client onboarding: GoHighLevel sub-account (workflows, pipelines, business profile, sending domain, email service), Cloudflare DNS and domain go-live.
- Wrote the business case for the agency's in-house email and SMS platform, then built it (Cloudflare Workers + D1, React, Resend, Twilio) with AI-assisted development (Claude Code). Every account was live about 5 weeks after the build started.
- Planned a phased migration of 10,000+ contacts with GoHighLevel kept running in parallel. Built in one-click unsubscribe, automatic opt-out on bounces and complaints, and an SMS block until A2P 10DLC approval.
- Built an internal campaign-ops hub (React + Firebase PWA, in daily production) that brings 5 scattered tools into one workspace. It pulls GoHighLevel campaign stats, plus bounce, spam and unsubscribe counts through a webhook.

Virtual Marketing Assistant

Doneverse · Philippines · Sep 2025 – Feb 2026

Agency that recruits, trains and matches marketing talent with US founders.

- As the agency's primary technical implementer, built and configured HubSpot, Mailchimp, Kajabi and Wix Studio accounts for founder clients.
- Shipped Mailchimp and HubSpot email systems with automated onboarding sequences and nurture flows.
- Owned onboarding for new platform setups (domain configuration, email deliverability). Delivered Wix Studio sites with Square payments in the checkout and intake flows.

SELECTED PROJECTS

Lead-generation automation — n8n + Claude + GoHighLevel (personal project)

- Designed a 47-node n8n workflow built to run on a daily schedule. It pulls 14 RSS feeds from 7 job boards, filters by target keywords and removes duplicates against a Google Sheet.
- Finds contact emails through a Hunter, Snov and Apollo fallback chain, has Claude personalize each opening, and syncs contacts, notes and opportunities to GoHighLevel. Drafts wait for human review and are never sent automatically.

EDUCATION

Bachelor of Science in Computer Science — Gordon College, Olongapo City · 2021–2025

Thesis: *DevPath: Bridging Students to Learning Opportunities through On-Demand Webinars and Certifications*, published at IRCITE 2025 (Bulacan State University).

Senior High School, TVL–ICT Track — Columban College Inc., Olongapo City · 2019–2021 · Graduated With High Honors
