

JOSHUA RALPH ADRIAN SOLOMON

Implementation Specialist — CRM, Web & Marketing Systems

Olongapo City, Philippines · Open to remote (US business hours) · +63 961 556 2117 · hi@solomonjoshua.com

solomonjoshua.com · [LinkedIn](#) · [GitHub](#)

Open to Full-Time Remote, Contract, or Fractional Retainer Engagements

PROFESSIONAL SUMMARY

Implementation specialist with 2+ years of agency experience configuring GoHighLevel CRMs, building custom-coded sites on Cloudflare Pages, and shipping marketing automation systems across Mailchimp, Kajabi, HubSpot, and n8n. Recently architected an internal SaaS platform (Vite + Firebase + multiple API integrations) replacing ClickUp for a US-based consultancy. Strong fit for roles spanning marketing technology implementation, technical client onboarding, or full-stack systems work for early-stage and SMB companies.

TECHNICAL SKILLS

CRM & Marketing Platforms: GoHighLevel (GHL), HubSpot, Mailchimp, Kajabi, ActiveCampaign

Web Development: HTML5, CSS3, JavaScript, React, Vite, Tailwind CSS, Wix Studio + Velo, WordPress, Squarespace

Hosting & DevOps: Cloudflare Pages, Cloudflare DNS, Vercel, Firebase, GitHub Actions

Workflow Automation: n8n, Make.com, Zapier, Anthropic Claude API, Google Sheets API, Canva API, GHL API

Compliance & Integrations: A2P 10DLC SMS registration, Square Payment integration, dedicated sending domain configuration (SPF/DKIM/DMARC)

Languages: English (fluent, professional), Filipino (native)

PROFESSIONAL EXPERIENCE

Implementation Specialist — CRM, Web & Marketing Systems

Feb 2026 – Present

Arrow Group Consulting — Michigan, USA · *Part-time ongoing contract*

- Technical lead for client onboarding — owning the full implementation stack (GoHighLevel configuration, custom-coded sites, domain go-lives, A2P 10DLC compliance) end-to-end across multiple accounts.
- Built and shipped custom-coded HTML/CSS/JS websites deployed on Cloudflare Pages, plus Wix Velo extensions for platforms requiring client self-edit access.
- Configured GoHighLevel sub-accounts per client — automations, business profiles, dedicated sending domains, email service connections — and managed Cloudflare DNS across the portfolio.
- **Architected and shipped a custom-built internal SaaS platform** purpose-curated for the agency's specific workflow — not a clone or off-the-shelf replacement. Stack: Vercel + Vite + Firebase + Anthropic Claude API + GHL API + Canva API + Google Sheets API. Currently powers all agency operations including Gmail-to-task automation, GHL contact sync, Canva asset triage, and Google Sheets reporting.
- Designed and shipped monthly email marketing campaigns and lifecycle automations; reported analytics from email and SMS blasts directly to founder and clients.
- Acted as the technical advisor to both clients and the founder — translating implementation details into plain language during onboarding calls and answering live technical questions.
- Coordinated with the project manager and social media manager to keep onboarding timelines on track; handled invoicing and back-office workflows.

Marketing Implementation Specialist

Sep 2025 – Apr 2026

Doneverse — Philippines · *Marketing services agency*

- Primary technical implementer across the agency — built and configured client accounts on Wix Studio, Kajabi, Mailchimp, and HubSpot.
- Delivered Wix Studio sites with integrated Square payment processing for client checkout and intake flows.
- Configured Kajabi course platforms and shipped Mailchimp/HubSpot email marketing systems for SMB clients.
- Ran LinkedIn outreach campaigns on behalf of clients — connection note writing, multi-touch follow-up sequences, lead nurturing through to booked discovery calls.

- Owned client onboarding for new platform setups, including domain configuration and email deliverability setup.

Freelance CRM & Automation Specialist

2024 – Present

Self-employed — Olongapo City, Philippines (remote) · *Independent practice*

- Build and operate marketing systems for early-stage founders and SMB owners — GoHighLevel CRM builds, custom Cloudflare Pages sites, email automation pipelines, and n8n-based lead generation systems.
- Operate a self-hosted n8n + Anthropic Claude API lead generation pipeline that pulls jobs from 6 RSS sources, enriches via Hunter/Snov/Apollo, and drafts personalized outreach at scale.
- Run own portfolio at solomonjoshua.com (React + Vite + Cloudflare Pages, GHL webhook integration, custom planner quiz).

SELECTED PROJECTS

Custom Internal Operations Platform (Arrow Group)

React + Vite + Firebase + Anthropic Claude API + multiple service APIs. Custom-built, purpose-curated for the agency's exact workflow. Active in production. Includes Gmail-to-task automation, GHL contact sync, Canva asset triage, and Google Sheets reporting.

n8n + Claude Lead Generation Pipeline (personal)

Daily-cron RSS scraper across 10 job boards, multi-provider email enrichment (Hunter → Snov → Apollo fallback chain), AI-personalized cold email drafting via Claude Sonnet, GHL CRM sync. Self-hosted on DigitalOcean.

solomonjoshua.com (personal portfolio)

React + Vite + Tailwind on Cloudflare Pages. Auto-deploys from GitHub on push. Custom quiz planner, services page, contact form posting to GHL webhook.

EDUCATION / CONTINUOUS LEARNING

Self-taught full-stack development and marketing operations. Continuous learning across CRM administration, no-code/low-code tooling, AI-assisted development (Claude Code, Cursor), and email deliverability best practices.

AVAILABILITY

- Open to full-time remote roles, contract roles, or fractional retainer arrangements.
- US business hours preferred (currently overlaps EST/CST/MST/PST).
- Comfortable communicating directly with founders and senior stakeholders.
- Strong written communication for async-first teams.
