

JOSHUA RALPH ADRIAN SOLOMON

Marketing Automation & Lifecycle Specialist — CRM, Email & SMS Systems

Olongapo City, Philippines · Open to remote (US business hours)

+63 961 556 2117 · solomonjoshua101602@gmail.com · solomonjoshua.com · [LinkedIn](#)

PROFESSIONAL SUMMARY

Marketing automation specialist with hands-on agency experience building and running lifecycle email and SMS systems on GoHighLevel, Mailchimp, HubSpot, and Kajabi. Configures end-to-end CRM workflows — audience segmentation, automated nurture and retention flows, A2P 10DLC SMS, and deliverability (SPF/DKIM/DMARC) — and ships the custom-coded sites and integrations behind them. Recently built AGC HUB, a custom internal platform (React + Vite + Firebase + multiple service APIs) unifying a US consultancy's tool stack. Strong fit for lifecycle and retention marketing, CRM administration, or marketing-automation roles at early-stage and SMB companies.

TECHNICAL SKILLS

- **Email & Lifecycle Marketing:** campaign builds, audience segmentation, automated nurture & retention flows, multi-touch sequences, A/B testing, analytics reporting
- **CRM & Marketing Platforms:** GoHighLevel (GHL), HubSpot, Mailchimp, Kajabi, ActiveCampaign
- **Automation & Integrations:** n8n, Make.com, Zapier, GHL API, Google Sheets API, Canva API, Anthropic Claude API
- **Deliverability & Compliance:** A2P 10DLC SMS registration, dedicated sending domains, SPF/DKIM/DMARC, Square Payment integration
- **Web & Hosting:** HTML5, CSS3, JavaScript, React, Vite, Tailwind CSS, Wix Studio + Velo, WordPress; Cloudflare Pages/DNS, Vercel, Firebase, GitHub Actions
- **Languages:** English (professional working proficiency), Filipino (native)

PROFESSIONAL EXPERIENCE

CRM & Email Marketing Automation Specialist

Feb 2026

Arrow Group Consulting — Michigan, USA · *Affordable CMO for start-ups, growing, and transitioning companies — marketing strategy, brand implementation, content creation, and web development*

- Build and run monthly email and SMS marketing campaigns and lifecycle automations across multiple client accounts — audience segmentation, automated nurture and retention flows — and report open, click, and delivery analytics directly to the founder and clients.
- Configure GoHighLevel sub-accounts per client end-to-end — automations, pipelines, business profiles, dedicated sending domains, and email service connections — and manage Cloudflare DNS across the portfolio.
- Own email and SMS deliverability across the portfolio: dedicated sending domains, SPF/DKIM/DMARC configuration, and A2P 10DLC registration for compliant text campaigns.
- Technical lead for client onboarding — owning the full implementation stack (GoHighLevel configuration, custom-coded sites, domain go-lives, compliance) end-to-end across multiple accounts.
- **Built AGC HUB** — a custom internal platform unifying the agency's scattered tools (Drive, ClickUp, Trello, GHL, Canva) into one system. Runs the end-to-end content production workflow: task assignment → team submission → review via GHL + Canva APIs → PM scheduling. Stack: React + Vite + Firebase + GHL/Canva/Google Sheets APIs. In daily production.
- Acted as technical advisor to clients and the founder — translating implementation and automation details into plain language during onboarding calls and answering live technical questions.

- Built and shipped custom-coded HTML/CSS/JS websites on Cloudflare Pages, plus Wix Velo extensions for platforms requiring client self-edit access.

Virtual Marketing Assistant

Sep 2025 – Feb 2026

Doneverse — Philippines · VMA agency that recruits, trains, and matches Virtual Marketing Assistants to US founders

- Built and shipped Mailchimp and HubSpot email marketing systems for SMB clients — automated onboarding sequences, nurture flows, and Kajabi course-platform integrations.
- Ran multi-touch LinkedIn outreach and follow-up sequences on behalf of clients — connection note writing, nurture cadences, and lead nurturing through to booked discovery calls.
- Owned client onboarding for new platform setups, including domain configuration and email deliverability setup.
- Primary technical implementer across the agency — built and configured client accounts on Wix Studio, Kajabi, Mailchimp, and HubSpot.
- Delivered Wix Studio sites with integrated Square payment processing for client checkout and intake flows.

SELECTED PROJECTS

AGC HUB — Internal Agency PWA (Arrow Group)

Custom PWA unifying the agency's scattered tools (Drive, ClickUp, Trello, GHL, Canva) into one platform. Runs the end-to-end content production workflow: task assignment, team submission, review via GHL + Canva APIs, PM scheduling. Stack: React + Vite + Firebase + GHL/Canva/Google Sheets APIs.

n8n + Claude Email Outreach Pipeline (personal)

Daily-cron lead pipeline across 10 sources with multi-provider email enrichment (Hunter → Snov → Apollo fallback chain), AI-personalized outreach drafting via Claude, and automatic GHL CRM sync. Self-hosted on DigitalOcean.

solomonjoshua.com (personal portfolio)

React + Vite + Tailwind on Cloudflare Pages. Auto-deploys from GitHub on push. Custom quiz planner, services page, contact form posting to GHL webhook.
